

Sweet Home Alabama

Executive motorized screens selected for award-winning modern Alabama home

"Our goal was to create a unique, calm and inviting ambiance that would link the indoor and outdoor spaces. Phantom's Executive screens offered a perfect solution to the dilemma of screening the lanai without affecting the design or blocking the views."

- Lisa & Rusty Alexander, builders and owners of Alexander Modern Homes

LOCATION:	Muscle Shoals, Alabama
STYLE:	Modern
DESIGNER:	Phil Kean Designs
BUILDER:	Alexander Modern Homes
PRODUCT:	Phantom Executive™ motorized retractable screens
MESH TYPE:	Fiberglass 18/14 mesh
NEED:	In order to enjoy home's extravagant 2,796 sqft. of outdoor living space in the hot summer months, the builders were looking for a screen solution that would provide protection from the intense sun as well as pesky insects.
SOLUTION:	Phantom's motorized screens were added to help cool down the home's lanai in the summer time and keep out the unwanted bugs.

OVERVIEW

Recipient of a BALA (Best in American Living™ Award) and two Aurora Awards, this breathtaking home sitting on the Tennessee River is a mix of modern design, stunning outdoor spaces and everyday comforts. The home's 2,796 square feet of outdoor living space creates a perfect blend of indoor and outdoor lifestyles. But in order to enjoy the outdoors in comfort, a screening system was needed to offer shade protection from Alabama's intense summer heat and keep out unwanted bugs.

Phantom's motorized screens were added to the home's kitchen and lanai. The screens offer shade, insect protection and natural ventilation all while keeping a clear view to the nearby river.

APPLICATION HIGHLIGHTS

Enjoy the view without the bugs

Phifer's 18/14 insect mesh with 58% openness keep out the pesky bugs while providing a clear view to the river.

UV protection

The screens block up to 40% of UV rays protecting the owners from Alabama's intense summer weather.

Complements any home

Phantom's motorized screens retract into cavities designed above the openings, completely hiding them from view. This way the screens don't distract from the design of the home.
